THE NEXT GENERATION OF DIGITAL HEALTH ENGAGEMENT: WHEEL OF LIFE™

Boost consumer engagement with new user experience
Research shows that over 40% of an individual’s general health can be influenced by their lifestyle and behavioral factors alone. Leading causes of death are being attributed to Non-Communicable Diseases (NCDs), which are mostly caused by lifestyle behaviors, such as smoking, lack of exercise or a poor diet. Besides the risk of developing NCDs, leading an unhealthy lifestyle poses a big threat to emotional and mental wellbeing.

Therefore, the importance of improving or maintaining a healthy lifestyle is paramount. The dacadoo Digital Health Engagement Platform (DHEP), featuring our award-winning Health Score, takes a holistic approach to health. Users are engaged in all aspects of their health, such as: nutrition, sleep, activity, physical & mental wellbeing, their mindfulness and even their smoking and alcohol habits.

“We know that now, more than ever, lifestyle choices matter.”

dacadoo is a global technology company that is driving the digital health engagement transformation. Founded in 2010, dacadoo is based in Zurich, Switzerland, with client services offices in USA, Australia and Japan. We partner with Life & Health insurers to ensure member engagement and improve profitability through personalized offerings.

We develop and operate a comprehensive Digital Health Engagement Platform (DHEP) to motivate users to achieve and maintain healthy lifestyle habits. The platform combines motivational techniques from behavioral science with functions from online gaming and social networking as well as automated, interactive coaching to activate and engage users.

It works as a personal health coach in users’ pockets, rewarding them for personal achievements and helping them to attain their goals.
A NEW GENERATION OF DIGITAL HEALTH ENGAGEMENT

Our newly launched Wheel of Life™ is our enhanced lifestyle navigator: it’s the trusted, evidence-based dacadoo Digital Health Engagement Platform, but with a fresh User Experience (UX) makeover. The Wheel of Life™ makes digital health engagement easier than ever. Encompassing seven different dedicated areas to track a user’s holistic health and offering even more personalized goals, our Wheel of Life™ is our most accurate and engaging lifestyle navigator to date.

Our smart digital coach is available 24/7 for users to receive relevant health and wellbeing advice. The preset user goals are better tailored, challenges are more frequent and personalized and our expert-curated content is more motivating than ever.

To enjoy the full power of dacadoo’s Wheel of Life™ Digital Health Engagement Platform, you can license it as a white label offering, and gain access to our out-of-the-box solution.

Alternatively, if you desire to build your own apps or extend features on your existing apps by using our technology, you may access our state-of-the-art API.

WHY WHEEL OF LIFE™ FOR INSURERS?

Our recent Industry research has shown that Covid-19 is propelling Life & Health insurers to introduce or enhance their wellbeing services. And independent studies, such as Deloitte’s, are pointing to consumers favoring those companies that offer a “#wecare” strategy to their customers and stakeholders.

Implementing our Digital Health Engagement Platform (DHEP) will allow your organization to rise above the rest. It poses the perfect solution to member engagement, as you’ll be able to increase their retention and satisfaction with your services. The dacadoo DHEP allows you to learn more about your key audience thus enabling you to tailor your products and services for your customers’ personal needs.

In addition, tracking lifestyle data opens up enormous opportunities for more personalized products and services, such as Pay-As-You-Live insurance based on an individual’s own lifestyle, or cross-selling wealth management services based on the continuously updated understanding of a client’s longevity – creating the ultimate win-win scenario for both insurer and consumer.

“Differentiate your company among a saturated market.”
